Safe Work Method Statement

SWM18 Toilet & Urinal Cleaning

STEP	ACTIVITY List steps/tasks to perform the activity in the actual sequence	HAZARDS Against each task list hazards that could cause injury	Level of Risk	RISK CONTROL MEASURE List control measures to eliminate or minimise risk	Level of Risk after Controls	RESPONSIBILITIES Name the person responsible (supervisor or above) to implement controls
1	Obtain chemicals and cleaning equipment from storage area	Chemical contact to skin	3	Wear correct protective clothing – gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals Makes sure chemical storage is locked before and after use	3	Supervisor to ensure training and assess for competency
2	Wash urinals with disinfectant	Chemical contact to skin	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals	3	Supervisor to ensure training and assess for competency
3	Rinse urinals with clean water	Chemical contact to skin	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals	3	Supervisor to ensure training and assess for competency
4	Wash all parts of toilet with disinfectant including seat, lid, inside and outside of bowl and pour cleaner into bowl	Chemical contact to skin	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals	3	Supervisor to ensure training and assess for competency

STEP	ACTIVITY List steps/tasks to perform the activity in the actual sequence	HAZARDS Against each task list hazards that could cause injury	Level of Risk	RISK CONTROL MEASURE List control measures to eliminate or minimise risk	Level of Risk after Controls	RESPONSIBILITIES Name the person responsible (supervisor or above) to implement controls
5	Scrub bowl using brush and scourer if required	Chemical contact to skin/Infection Risk of needle stick injury	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals	3	Supervisor to ensure training and assess for competency
6	Thoroughly rinse toilet brush in disinfectant solution	Chemical contact to skin	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals	3	Supervisor to ensure training and assess for competency
7	Starting from the highest point and using a new cloth, wipe down the cistern, pipes, toilet roll holder, sanitary disposal unit and marks on walls	Chemical contact to skin	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum	3	Supervisor to ensure training and assess for competency
8	Wash cleaning cloths with hot water and return all equipment to store area clean and dry	Chemical contact to skin/Infection Risk of needle stick injury	3	Wear correct protective clothing– gloves and enclosed non slip footwear as a minimum Check SDS prior to use of chemicals Makes sure chemical storage is locked before and after use	3	Supervisor to ensure training and assess for competency

Safe Work Method Statement

SWM18 Toilet & Urinal Cleaning

Step 1 – Estimate the consequences of an incident occurring

Consequence	Incident
Catastrophic	Fatality or permanent serious disability or permanent ill health
Major	Serious injury, permanent part disability, long-term illness
Moderate	Medical treatment required and several days off work
Minor	First aid treatment required
Insignificant	No injuries

Step 2 – Estimate the likelihood of an incident occurring

Likelihood	Description
Almost certain	Expected to occur in most circumstances
Likely	Will probably occur in most circumstances (ie has been known to occur, or has occurred before)
Possible	Might occur at some time (ie have heard of it happening)
Unlikely	Could occur, but no known instances previously
Rare	May occur only in exceptional circumstances

Step 3 – Determine the risk rating

	Catastrophic	Major	Moderate	Minor	Insignificant
Almost certain	1	1	1	2	3
Likely	1	1	2	3	3
Possible	1	2	3	3	4
Unlikely	2	3	3	4	4
Rare	3	3	4	4	4

Hierarchy of Controls

The hierarchy of controls must be applied in the order below for all identified hazards. The higher the risk score, the more emphasis should be placed on the more effective controls, such as elimination or substitution.

1. Elimination

Elimination is the most effective way of managing a risk. For example – filling in a hole to remove a trip hazard.

2. Substitution

This is the most effective way to manage a risk. For example – using a less harmful chemical.

3. Isolation / Engineering

Isolation may include limiting how many people are exposed to a hazard. For example – using noisy equipment at night time when less people are present.

4. Administrative

Examples of this kind of control include training and instruction.

5. PPE

PPE is the least effective of all the controls and should be seen as the last line of defence.
